Dalozzo Art

Accessible fine art for your home

Recently on *Better Homes and Gardens TV* Grahame Bond showed how to hang things on walls! The story appeared in the August issue of the magazine; back issues available on 1800 658 242.

We had so many calls about the Dalozzo art Grahame displayed we tracked down the details.

The Dalozzo family of three artists, is a dynamic combination of mother, father and daughter. As a result of their combined fifty-six years of practicing artwork, their unique galleries have had an impact on our perceptions of the accessibility of fine art.

Calculators

Belgian born Lucette, mum to Judith and wife to Louis is the most prolific artist having exhibited from Europe to the Asia Pacific. Her once romantic impressionistic style has given way to a strength of line and colour which holds the eye captive immediately.

Judith has followed in her mothers' footsteps, graduating from the Ecole des Beaux Arts in Belgium; but there the comparisons end. Judith's geometric compositions display a complete opposite of approach to creativity to Lucette's flowing images.

It is Louis' vibrant landscapes, which enchant the viewer with red earthy forms and open blue skies. These pieces are a result of twenty years of raw talent, with input and encouragement from wife Lucette.

The Dalozzo family's new Gold Coast gallery, opened in June and is located at Chevron Renaissance. "It is a new era. A new venture and an opening to start painting on very large canvases," says Lucette, who has a studio attached to the gallery. The new space also boasts a Belgian Cafe, serving the best in crepes, as well as an airy print and fine art gallery with viewing room.
